

Services & Starter Pricing

Fishhawk Technologies builds controlled, human-approved AI agents for document review, workflow automation, monitoring, reporting, and internal decision support.

What we build

Document & knowledge agents

Summaries, review checklists, missing-detail flags, policy lookup, document comparison, and internal knowledge assistants.

Workflow automation assistants

Inbox triage, routing, task creation, draft responses, approval queues, reminders, and operational handoffs.

Monitoring & briefings

Recurring research, operational monitoring, change detection, evidence trails, dashboards, and executive summaries.

Recommended starter path

1. Discovery

\$500–\$1,500

Map the workflow, users, systems, data, privacy needs, approval points, and best first pilot.

2. Pilot build

\$2,500–\$7,500

One controlled AI workflow in 2–4 weeks. Human approval, sample testing, and practical first-version scope.

3. Managed support

\$750–\$4,000/mo

Monitoring, prompt/rule tuning, workflow updates, quality review, and careful expansion into more use cases.

Example pilot scope

Included

- One document, inbox, reporting, or task workflow
- Agent instructions and safety boundaries
- Structured output: summary, checklist, flags, or draft
- Human approval workflow
- Basic logging / evidence trail
- Staff review and tuning session

Usually not first

- Deep EHR/ERP/CRM integrations
- Autonomous external communications
- Replacing licensed or accountable judgment
- Large multi-agent platforms
- Uncontrolled consumer AI handling private data
- Big-bang automation across the whole office

Best first conversation

Bring one repetitive workflow, document process, inbox problem, reporting task, or operational bottleneck. We'll identify whether an AI agent can safely save time, reduce missed steps, and create better visibility.
